

Smith Family Organization

Date:
Fall 2012

Medium:
Adobe Photoshop, Adobe Illustrator, WordPress

Type:
Individual Design & Development Project

Project:
Website design for Smith Family Organization

This Freelance project came from not keeping my big mouth shut when I am around my neighbors. Mr Smith didn't go to Washington, but he does have a lot of family history. I designed this site in Adobe illustrator and had the CSS and markup created by an off shore development house.

Campaign Objectives:
Create a family history site that the client could update and modify without the need of an in-house a developer.

Format:
1. WordPress Website
