George Washington Jewel Case

Date:

Fall 2007

Medium:

Adobe Photoshop, Aldus Freehand

Type:

Individual Design Project

Project:

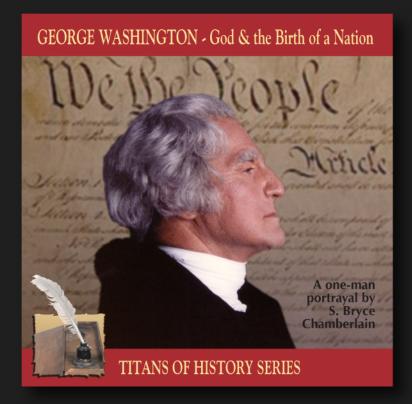

Create a jewel case design.

I have worked with this client for many years. He does one-man historical reenactments of inspirational past presidents, and religious leaders. From these one-man performances he has built up a repertoire of material that was recorded for this cd, as well as others.

I created a logo in the form of a feather pen and paper, that is reflected in his other Cd's and tapes in his other historic depictions.

Format:

1. CD Jewel Case

George Washington - God & the Birth of a Nation

This professional recording of George Washington, God & the Birth of a Nation is a presentation commemorating more than 220 years of remarkable government and freedom, created by a people who were influenced daily by divine guidence and insights that were unique in the history of mankind. Today there are continual threats against that sacred document with an endless barrage of anti-constitutional bias calling for extreme measures of change and the incessant denial of divine intercession throughout the founding of this remarkable nation. In this brief one-man portrayal, the author shares Washington's firm belief that "God governs in the affairs of men

The concept of this George Washington CD is the first in a Titans of History series by S. Bryce Chamberlain. Other portrayals will include Thomas Jefferson, Benjamin Franklin, Christopher Columbus, Johann Gutenberg and John Lathrup, all illustrious and influential men of historical significance. Other CDs available today include Chamberlain's LDS Church history-oriented, one-man portrayals of Joseph Smith, Brigham Young, and Moroni as well as The Wentworth Letter/King Follett CD and The Lectures on Faith three CD set.

For more than fifty years S. Bryce Chamberlain has received inquiries from all over the world to perform one-man interpretations of great men and events in history. New, challenging requests call upon him to research, develop, limb-out, produce and present each characterization. He has spent thousands of hours researching and has performed in virtually every state and many countries around the world on four continents. He is constantly involved with commemorative events honoring many of the Titans of History.
